

FOR IMMEDIATE RELEASE

LED Specialists, Inc. Partners with MEDCO

*Now offering lighting OEMs turn-key design- to-production services
for LED based components*

Kings Park, NY (May 12, 2008) - LED Specialists, Inc., a leading provider of LED lighting solutions, announced today the formation of a new division “LED Specialists – Devices, LLC” in partnership with MEDCO (Merit Electronic Design Co.) of Edgewood, NY to provide LED module and related electronics manufacturing to support the lighting industry’s growing need for qualified and experienced sources of LED based component production.

This company will provide customers with an experienced Engineering and Production source for custom or build-to-print LED modules, drive electronics and other components to support the rapidly growing lighting fixture industry migration to Solid State Lighting. The 22,000 sq-ft Long Island based manufacturing plant has state-of-the-art auto-insertion, wave solder (lead and lead free), screen printing, inspection and test equipment. With competitive component purchasing power and complete supply chain management, LED Specialists – Devices can provide products from prototype levels through high volume production.

“Our lighting industry OEM customers have been asking us to merge a production capability “under the same roof” as our proven engineering services – to give them a one-stop-shop for their LED product needs. LED Specialists can now provide our customers with turn-key “design-to-production” services taking responsibility for the bridge between engineering and manufacturing, allowing our customers to accelerate time-to-market in this rapidly expanding industry,” said Mike Fusco, President of LED Specialists.

“MEDCO has a 35 year history in providing contract manufacturing services to military, telecommunications and other industries. We are extremely excited about this partnership with LED Specialists to bring our capabilities to the Solid State Lighting industry. We believe we can provide a unique combination of value and service, with tremendous flexibility that customers are looking for in this evolving technology,” said Guy Intoci, President of MEDCO.
